New York Stock Market

New York, August 11 .- Following a spirited opening, in which prices of a number of issues advanced a full point number of issues advanced a full point with a gain of 13-4 for Canadian Pacific, to-day's stock market fell back in large part and halted for the greater part of the seasion while its devotees discussed various matters bearing more or less remotely in the financial gain. The Street chose for its tavorite topic the retirement of Mr. Frick from the Harriman boards and faw fit to draw many inferences from that event, none of which was especially bullish. In fact, it clearly inclined towards the belief that the gas left by Mr. Frick is not only larger, but that it was probably impelled by a combination of circumstances which has cropped up in the past decade and has recently been renewed with increased vigor. In the minds of the speculative community Mr. Frick's withdrawal from Union Pacific and allied properies also helped in no small degree to explain thy recent heavy offerings at marked recessions of Harriman issues and other stocks of the same class. Mr. Frick's intention to retire was known to many of his associates for several weeks, and this knowledge probably percolated to outside sources which saw in the act a logical reason for selling the market. The efforts of this faction were successful chiefly because the so-called bull account reared in the early months of the year had become staic, after abortive attempts had been made to lift the list from a jevel already too high. with a gain of 13-4 for Canadian Pa-

prices. The closing was active and extremely weak.

Figures bearing significantly on our foreign trade were disclosed in the official statement of the country's exports of manufactured steel and from in the fiscal year. They show a gain of almost \$i,000,000 over the best previous year, the total valuation of shipments to foreign countries approximating \$231,000,000 with a concurrent decline of \$4,000,000 in imports of this class of merchandise.

Earnings of thirty-five additional roads for June thow a decrease of almost \$1,700,000 in gross, which was cut to a net decrease of \$500,000 by reducing operating expenses.

Little interest was shown in the forecasts of the week's money movements, which point to a gain by local banks of between \$3,500,000 and \$5,00,000.

London was a large nurchaser here.

Bradstreet's Report.

New York, August 11.—Bradstreet's to-morrow will say:

"Orders for future delivery indicate further moderate improvement in the trade situation, house as well as road saies expanding in fair degree, Many visiting buyers are in the country's leading markets, and those hailing from the cotton growing sections of the South and Southwest are disposed to purchase quite freely. Talk from buyers in general is optimistic enough, but, withal, purchases on the whole show that considerable cantion prevails. This attitude is easentially apparent among those catering to the ecreal producing regions, where crops underwent, further deterioration in July. It is noteworthy, hewever, that recent rains have made for a better feeling as regards corn crop results, and in consequence merchants are fostering more roseate anticipations, tering more roseate anticipations, tering more roseate anticipations, tering more roseate anticipations, the more roseate anticipations, within controllable bounds, and the with and without baths. Spaclous the arrival of buyers, should bring the arrival of buyers, should be arrived the arrival of buyers, should bring the arrival of buyers, should be arrived to the arrival of buyers, should be arrived to the arrival of buyers, should be arrived to the arrival arrived the arri

about a further seasonable increase in trade. In some sections requests for shipments on orders that were held up last month are being made. Dry goods, allied lines and millinery lead in point of relative activity. Where demand for cotton goods has developed, the fact is brought out that supplies of some desirable grades are short, this being due to curtailment, past and present. Pig iron is firmer under increased demands, but attractive business in finished products reveals the existence of competition and some price-cutting. Collections run from fair to slow.

"Business failures in the United

"Business failures in the United States for the week ending August 10 were 208, against 208 list week and 231 in the like week of 1910, 219 in 1909, 249 in 1908, and 146 in 1907.

"Wheat, including flour, exports from the United States and Canuda for the week ending August 10, aggregate 2,560,967 busnels, against 3,321,308 last week and 1,226,214 this week last year. For the fix weeks ending August 10 exports are 13,221,342 busnels, against 7,543,957 in the corresponding period last year. Corn exports for the week are 635,781 busnels, against 222,781 last weeks and 190,671 in 1910. For the six weeks anding August 10 corn exports are 3,717,589 busnels, against 1,308,298 last year.

New York, August 11.—R. G. Dun's Weekly Review of Trade to-morrow will say:

will say:

"There is further evidence of a feeling of confidence that the autumn will bring a broadening in trade activity, while business now continues to expand moderately.

"The expansion in the demand for steel products continues very gradual." In cotton goods the adjustment of cloths to raw cotton prices continues the most difficult problem, and is complicated by the greater curtailment at the mills. Bleached sheetings have touched bottom for the jobling season and have been advanced 1.8c a yard. Some advances are named on staple men's wear woolens, where orders have been good in volume, but unsatisfactory as to profit. Yarn markots are irregular and tending downward.

"In footwear buyers are not disposed generalia."

"In footwear buyers are not disposed generally to take larger amounts than for current needs, preferring to await more certain knowledge as to styles. Leather is still in moderate demand, buyers operating only in a limited way, New England shoe manufacturers feeling that the volume of footwear business does not warrant any considerable anticipation."
